

Teng-Wei (Dans) Huang

Support Operations Engineer | Production AI and Automation Beyond Zendesk

Based in Taipei, Taiwan | Seeking full-time remote | dans.huang@hey.com | +886 972 272 189 | LinkedIn | Portfolio

Support-native systems builder: seven years from frontline troubleshooting to running production support operations. I personally built and operate the layer beyond Zendesk - AI ticket workflows, API and cross-stack automation, governed retrieval, evaluation, reporting, and incident controls. The operation handled 48,029 tickets in 2025; AI finished 42-45% of closed tickets in June-July 2026, measured by final-assignee share. I build with AI coding agents under my review, ship through fixed evaluations, staged release, and rollback, and I own what happens in production.

EXPERIENCE

Support and Quality Control Manager

Mar 2024 - Present

POSITIVE GRID

- Built and operate the production layer beyond Zendesk: 24/7 AI ticket classification, research, resolution, and escalation; custom API and side-app workflows; a Slack operator interface; human approvals; and auditable actions.
- Scaled a 24/7 AI ticket agent to finish 42.6% (June 2026) and 44.7% (July 2026) of closed tickets - final-assignee share, not containment - under human approval, policy escalation, and per-ticket cost and outcome controls, in an operation that handled 48,029 tickets in 2025.
- Architected cross-stack automation spanning Zendesk, Jira, registration, returns, logistics, and payments; a regional warranty flow reduced service coordination from 2-3 weeks to under 3 days and logged 99 successful executions in its latest 100-run sample (Aug 5, 2026).
- Expanded the production evaluation suite to 250 cases across support categories and security scenarios, with shadow and preview modes, regression gates, and rollback; ran a scored five-model bake-off on the prior 137-case set, then staged the selected model behind live-path probes.
- Diagnosed a multi-day silent AI outage that process-level health checks missed; rebuilt monitoring around per-ticket outcomes with capacity preflight, bounded retries, an all-error tripwire, and a batch circuit breaker. Daily reviews route DSAT, emerging-issue, and knowledge-gap findings to designated owners.
- Built governed knowledge and hybrid retrieval for people and AI, including confidence-gated dense and sparse search, lifecycle controls, and a Help Center redesign driven by Zendesk demand data.
- After personally building the initial AI operations system, documented it and developed four support specialists into owners of AI maintenance, process automation, knowledge operations, and specialist support.

Technical Support Manager

Jul 2023 - Mar 2024

POSITIVE GRID

- Led queue, capacity, launch readiness, recruiting, budget, and complex escalations for a global support operation.
- Built Zendesk reporting, individual scorecards, and MaestroQA calibration to make volume, quality, efficiency, and coaching needs visible.
- Partnered with Product, Ecommerce, Marketing, and Web to turn recurring customer friction into journey, content, and process fixes.

EXPERIENCE, CONTINUED

Senior Training Specialist

Jan 2021 - Jun 2023

POSITIVE GRID

- Owned product and process training for in-house and outsourced support; delivered 50+ English and Mandarin sessions and onboarded every new hire through a structured program.
- Built the support knowledge base across five iterations and introduced MaestroQA, creating the documentation, audit, and coaching loop that later supported AI operations.

Technical Support Specialist

Jul 2019 - Dec 2020

POSITIVE GRID

- Resolved global hardware, software, and digital-audio issues through email, live chat, and remote sessions, and translated recurring failures into product and process feedback.

Technical Support Specialist - Yamaha Music & Electronics Taiwan

2018 - 2019

Sales & Support - ATB Music World, Taipei

2017 - 2018

SKILLS

Support stack: Zendesk Admin, Explore, REST APIs, and side apps; MaestroQA; Jira; Qase

AI and retrieval: LLM APIs; RAG and hybrid retrieval; Pinecone; Qdrant; evaluation design; Langfuse tracing; n8n

Systems: Python automation services; Slack Bolt; Bash; cron; launchd; Git and GitHub

Languages: Mandarin, native; English, professional (TOEIC 965)

EDUCATION

National Taiwan University of Science and Technology

Bachelor's Degree in Industrial Management, 2012 - 2015
