

Teng-Wei (Dans) Huang

Support Operations Engineer | Production AI and Automation Beyond Zendesk

Based in Taipei, Taiwan | Seeking full-time remote | dans.huang@hey.com | +886 972 272 189 | LinkedIn | Portfolio

Support-native systems builder: seven years from frontline troubleshooting to running production support operations. I personally built and operate the layer beyond Zendesk - AI ticket workflows, API and cross-stack automation, governed retrieval, evaluation, reporting, and incident controls. The operation handled 48,029 tickets in 2025; AI finished 42-45% of closed tickets in June-July 2026, measured by final-assignee share. I build with AI coding agents under my review, ship through fixed evaluations, staged release, and rollback, and I own what happens in production.

EXPERIENCE

Support and Quality Control Manager

Mar 2024 - Present

POSITIVE GRID

- Own the support technology and automation layer beyond Zendesk, designing and operating AI-assisted ticket workflows, agent tools, API integrations, knowledge retrieval, reporting, and production controls.
- Built and scaled a 24/7 AI support operation that finished 42-45% of closed tickets in June-July 2026 within a global operation that handled 48,029 tickets in 2025, while keeping policy, approval, and escalation decisions human-owned.
- Architect cross-stack automation across Zendesk, Jira, registration, returns, logistics, and payments to remove repetitive work and manual handoffs; warranty service coordination improved from 2-3 weeks to under 3 days.
- Own AI quality and release governance through fixed evaluation sets, security testing, shadow and preview modes, staged rollout, outcome monitoring, incident controls, and rollback.
- Built the knowledge infrastructure for people and AI, including Help Center redesign, lifecycle governance, hybrid retrieval, and recurring knowledge-gap detection informed by real support demand.
- Built reporting and feedback loops that connect ticket volume, service quality, DSAT, emerging issues, and Voice of Customer to team priorities, leadership decisions, product fixes, and enablement.
- After personally building the initial AI operation, documented the systems and developed four support specialists into owners of AI maintenance, process automation, knowledge operations, and specialist support.

Technical Support Manager

Jul 2023 - Mar 2024

POSITIVE GRID

- Led daily support operations across queue health, capacity planning, launch readiness, recruiting, budget, and complex escalations for a global customer base.
- Managed hiring, onboarding, coaching, and performance through structured 1-on-1s, scorecards, and development plans.
- Built Zendesk reporting and MaestroQA calibration to make service volume, quality, efficiency, and coaching needs visible.
- Partnered with Product, Ecommerce, Marketing, and Web to turn recurring customer friction into journey, content, and process improvements.

EXPERIENCE, CONTINUED

Senior Training Specialist

Jan 2021 - Jun 2023

POSITIVE GRID

- Owned the full product and process training lifecycle for in-house and outsourced support; delivered 50+ English and Mandarin sessions and onboarded every new hire through a structured program.
- Built the support knowledge base across five iterations and introduced MaestroQA, creating the documentation, audit, and coaching loop that later supported AI operations.
- Managed service quality, training, and process alignment for a 10+ person external support agency alongside the internal team.

Technical Support Specialist

Jul 2019 - Dec 2020

POSITIVE GRID

- Resolved global hardware, software, and digital-audio issues through email, live chat, and remote sessions, and translated recurring failures into product and process feedback.

Technical Support Specialist - Yamaha Music & Electronics Taiwan

2018 - 2019

Sales & Support - ATB Music World, Taipei

2017 - 2018

SKILLS

Support stack: Zendesk Admin, Explore, REST APIs, and side apps; MaestroQA; Jira; Qase
